 - **Basic Proceeding Knowledge:** Python, TypeScript - No project has been done yet.
 - **Software & Tools:** VS Code, Git & Github, Netlify, Chrome Dev Tool, Adobe Photoshop, Figma, Canva, Heroku.
-

Projects:

- **Honda24.Car website: (MERN Stack)**
[| Live Preview |](#) [| Github-Client-Side-Code |](#) [| Github-Server-Side-Code |](#)
This is a car-related full-stack website. Here I have tried to cover both back-end and front-end with React Routing. I have tried to add all the systems to the dashboard with a payment gateway system.
 - **Medical Care website: (Front-End)**
[| Live Preview of Firebase |](#) [| Github-Client-Side-Code |](#)
This is a medical care-related website. Patients will be able to book serial in advance on this website. This website is made with React.js or there are many routing users who can go to any route if they want.
 - **Our Developer Community website: (Front-End)**
[| Live Preview of Netlify |](#) [| Github-Client-Side-Code |](#)
This is a very simple website, a website made only for developers. This site has a cart add system that anyone can add developers if they want. This website also has simple react routing with React.js.
-
